

Class GSU-5: GeoNet RTK Network Setup and Use

Class Description:

GeoNet RTK Network Setup and Use is a one day, instructor led, class providing students with a working knowledge of GeoNet's GNSS Network and how to utilize it to increase their productivity. The class will combine both classroom discussion and in field activities.

Objectives:

Upon completion of this class, the student will be able to successfully connect to the network with survey and machine control equipment, perform jobsite localizations with the network, understand how the network works, and understand when and how to best utilize the network for your business whether you are a surveyor or contractor.

Syllabus:

- Overview of GNSS Networks
- Overview of equipment needed to use the Network
- Connecting to the network with the different equipment
- Jobsite localization
- Stake out and Topo with the Network
- Troubleshooting
