

Class GSU-6: Customized Onsite Training

Class Description:

Customized Onsite Training is a one or two day, instructor led, class providing students with working knowledge of any aspect of construction layout, GPS machine control, or Data prep that a company needs to be more knowledgeable about. We will train you on the aspects of your business that you request. We will also offer expert advice on the areas with room for improvement.

Objectives:

Upon completion of this class, the student will be more knowledgeable and proficient at the tasks covered in the class.

Syllabus:

- 100% customized by the customer with the expert advice of a GeoShack University representative.
